

Notes from MTS Technology Committee- 3.3.22

Overall agenda: How can we be more efficient, cost effective etc. on how we use technology

- Better inventory/visibility for technology resources that are used in different programs etc.
- Better training and shared resources between programs
 - E.g. Calendly (did a demonstration in Tech Tools at MNVS)

Tim is creating/sharing a Google Sheet to populate a lot of “what are we using now” that he pulls from Google etc. Bill will add other resources/curriculum that we purchase as well as sharing that out with other directors and people who can help populate the list.

The goal is to see if there are things we have that are redundant (cancel subscriptions etc.), things we need to prepare/train people on, ways to be organized and timely when it comes to managing subscriptions and timelines, etc.
